Cyber-Terrorism in Healthcare

Waiting for the Next Attack Can Cost Your Career. Why Let It?

Let us hack you. The complexities of cyber-security and privacy in healthcare are inconceivable. *Think about it.* Every single device in your organization that operates electronically - whether connected to the Internet or not - is hackable. Add in your supply chain and the cloud - the complexities now become more exponential.

You've made great efforts with securing your systems, but we've spent decades designing, developing, implementing, and testing these systems. Now, we hack them!

DIVURGENT — Redefining Consulting. Transforming Healthcare. [sensato]

Cyber-Security and Privacy Solutions…Made Simple!

Board/C-Suite Briefings
Demonstrate real-time attacks and key challenges facing your organization to your executive team

Assessments & Penetration Testing
Initiating live attacks, we test an organization's readiness, identify challenges, ensure vendor's security, and provide remediation plans for vulnerabilities

Project Management
Develop and implement cyber-security strategic plans unique to your healthcare ecosystem

Custom Training & Workshops
Design/deploy custom high-performance systems that are scalable, reliable, and also secure

BAM, Business Associate Manager
Track how your Business Associates (BA) are responding to potential threats, through this sophisticated platform

HIT-Sec360
Provide 360° of security/compliance coverage tailored to your organization's exact needs

Focused Solely on Healthcare IT Ecosystems

Divurgent and Sensato bring an in-depth understanding of the complexities, technologies, and, most importantly, security-related vulnerabilities and challenges facing today's health IT organizations and leaders. This unique partnership provides healthcare organizations a means to lower risks, decrease vulnerabilities, and evolve their understanding of cyber-security.
